

## **Lending Cycle, Inc. Selects n|Frame for Data Center Environment**

### *Selection Completes Nine Month Search*

LOUISVILLE, KY (August 27, 2007) – Lending Cycle, Inc. (LCI), an emerging innovator in Lender Productivity and Workflow Automation for Financial Institutions, has selected Indianapolis based n|Frame as its primary data center management vendor. LCI's entire production application environment will be moved to n|Frame's SAS 70 Type II 99.999 audited data center with disaster recovery systems remaining in Louisville Kentucky.

LCI flagship product, LendingCycle, is an easy Lender Productivity and Workflow Automation solution that monitors performance and compliance items and focuses on a more efficient lending environment for Financial Institutions. It's currently in final Beta Testing and is expected to be released in January of 2008. Since LendingCycle will be accessed through a Web browser, LCI takes great strides to ensure the quality of its data environment.

"We are extremely serious about the needs of our customers, and how we service those needs," said John Jackson, Chief Executive Officer of Lending Cycle, Inc. "We made an exhaustive search of data centers that could provide us with exceptional 24/7 data center management while also meeting SAS 70 Type II compliance. Their audited 99.999 environment and skilled team were a great fit with our needs."

LCI's entire production application environment will be moved to n|Frame by October 1<sup>st</sup>, 2007 prior to the end of its final Beta Testing.

### **About Lending Cycle, Inc.**

*Lending Cycle, Inc. (based in Louisville, Kentucky) produces easy Lender Productivity and Workflow Automation solutions that monitor compliance items (such as Exception Items – pre and post close) and truly build a more efficient lending environment. Their applications are built specifically for Lenders and designed to revolutionize the solution paradigm for Financial Institutions. [www.LendingCycle.com](http://www.LendingCycle.com)*

### **About n|Frame**

*As a SAS 70 Type II compliant organization, n|Frame helps companies achieve true business continuity through a unique failover model that integrates backup systems with standard operating procedures. This is accomplished through n|Frame's advanced technology infrastructure that includes a professional data center, commercial Internet connectivity and a state-of-the-art workplace recovery center. n|Frame supports enterprise Internet applications (ASPs), networks, e-commerce Web sites, call centers and workplaces with premium data center outsourcing and colocation; router, firewall and switch management; 24/7 network, system and hardware monitoring; Web, application, database and e-mail system hosting; e-mail management and protection services; and customizable disaster recovery solutions (including Agility™ mobile recovery units). n|Frame is owned by Continental Broadband and operates from Carmel, Ind. near Indianapolis. To learn more about the company, please call 317-805-3759 or visit [www.nframe.com](http://www.nframe.com).*
